CODE OF GOOD CONDUCT

INTRODUCTION

To make the Training Grounds an ordered and safe place to work, Trainers and their staff must follow this Code of Good Conduct at all times failing which the Trainer's JCE Permit to train may be withdrawn, pursuant to Clause 15 of the Rules. The Code has been drawn up by Jockey Club Estates in consultation with the Chairman of the Heath Committee and Chairman of Newmarket Trainers' Federation in Newmarket and the Chairman of the Mandown Gallops Committee.

1 STAFF

1.1 All staff, and especially senior members of staff, should be aware of and fully understand the Rules for use of the Training Grounds and this Code of Good Conduct.

1.2 It is mandatory under the Rules of Racing for all riders to wear skull caps, with chin straps secured and for all riders, other than those on hacks, to wear back protectors.

1.3 No rider should engage in any activity which may affect their ability to keep full control of their horse, including unnecessary use of a mobile phone.

- Mobile phones may only be used in emergencies or when contacting a trainer.
- Bluetooth devices are encouraged for trainer communication while riding.

1.4 All strings must be easily identifiable with saddle pads or sheets and skull cap cover with the yard branding/colours.

2 STRING MANAGEMENT

2.1 Excessive force must not be used to encourage a horse onto the gallops, canters, lunge rings, stalls, etc. Incidents of such a nature will not be tolerated.

2.2 Strings should be of a manageable size with an appropriate number of experienced staff in supervisory roles that are easily identifiable to Jockey Club Estates employees.

2.3 No string should pass another string from behind while on the horsewalks unless otherwise agreed.

2.4 One string should not cut in front of another string at any time and particularly one about to set off on a gallop or canter.

2.5 Lead riders should communicate the string's intentions clearly to other strings.

2.6 Strings should not set off too closely behind the preceding string. The following string should judge the speed of a preceding string to avoid catching it up.

2.7 If working horses at a slow canter (yearlings or horses returning to exercise) the string behind must be informed.

2.8 Use of the Training Grounds by lone horses should be avoided. If unavoidable, the Trainer must be aware of the route the rider is to take and raise the alarm if they do not return to the yard at the expected time.

3 ROAD CROSSINGS

3.1 Each string is responsible for carrying out a dynamic risk assessment before crossing the road at any of the designated horse crossings.

3.2 Where possible, no more than 20 horses should cross the road at one time without

breaking to allow vehicles to pass. Smaller strings should avoid tacking onto the end of larger strings.

- 3.3 Where a junction on a horsewalk is near to a road crossing, strings who are already on the horsewalk should give right of way to those crossing the road.

3.4 Strings should lay up at all times to ensure they cross the road in a timely manner.

- 3.5 Riders should not assume that vehicles have seen them and will stop. Riders should press the whip switches where applicable, stop before walking their horse onto the crossing, look to see if approaching cars have stopped and go when it safe to do so.

- 3.6 Where triggers operate flashing warning lights or traffic lights, these should be armed prior to crossing and disarmed where necessary.

- 3.7 As many riders as possible should thank waiting drivers, but as a minimum the first and last riders in the string.

- 3.8 Any accident, near miss or loose horse must be reported to Jockey Club Estates or on the British Horse Society website (<https://www.bhs.org.uk/our-work/safety/report-an-incident>).

4 STALLS

- 4.1 If using any of the stalls provided, leave them unset and with gates open.

- 4.2 On stalls with corrals, shut the corral gate after use.

- 4.3 Report any breakages of the stalls to the relevant Operations Manager immediately.

5 FENCES, HURDLES AND OTHER EQUIPMENT

- 5.1 If you damage fences, hurdles or any other equipment on the Training Grounds, please report it to a member of JCE staff immediately so that it can be repaired as soon as possible. Please contact the Links on 07710 819442.

**PLEASE USE COMMONSENSE AND BE COURTEOUS AT ALL TIMES
THANK YOU FOR YOUR COOPERATION**

6. ACCIDENT RECORD

- 6.1 All accidents should be reported immediately to the relevant Operations Manager and the details given. This is so the accident can be investigated and any corrective actions can be made. - 6.2 Trainers do not need to report an accident to JCE which occur in their stables.
- 6.3 Trainers and their staff will do all that is reasonably practical to restrain an injured horse until the arrival of veterinary assistance.

- 7.2 If there is an injured animal they will close to training the area near the accident.
- 7.3 Post a person at the first access point to assist veterinary services on arrival.

8. ACCIDENT REPORT

- 8.1 Those in attendance will be expected to make a brief report of the circumstances to the relevant Operations Manager.

INFECTIOUS DISEASE PROTOCOL

1 GENERAL

- 1.1 Infectious Disease is a serious threat to the HRI in Newmarket. With more horses travelling overseas the likelihood of infection has increased. In order to minimise this threat, trainers are reminded to follow the NTF Code of Practice for Infectious Diseases of Racehorses in Training at all times. In addition to this Code of Practice trainers are also required to follow this simple protocol to protect other users of the Training Grounds.

2 SUSPECTED INFECTIOUS DISEASE

- 2.1 Trainers are to inform JCE as soon as it is **suspected** that any horse under his/her care is infected with diseases covered by the Horseracing Betting Levy Board Codes of Practice on Equine Diseases (such as Equine Influenza, Strangles or Neurological Herpesvirus).
- 2.2 JCE can then (in the strictest confidence) assist the trainer and veterinary practice involved with the management of the case, to reduce the risk of the suspected disease spreading.
- 2.3 The trainer must also observe any statutory requirements and immediately inform the BHA. Until directed otherwise by the BHA, the trainer must not remove from the premises, or allow to be removed, any horse under his/her care or control.

3 CONFIRMED DIAGNOSIS OF INFECTIOUS DISEASE

- 3.1 Once the disease has been diagnosed, the following steps should be taken:
- Trainers should abide by the NTF Code of Practice for Infectious Diseases of Racehorses in Training;
 - Trainers must inform BHA and confirm with JCE;
 - JCE will then communicate to the IDRC (Infectious Disease Response Committee).
- 3.2 N.B. Trainers are obliged to report without delay any confirmed diagnosis of a clinical case of Strangles or Neurological Herpesvirus stabled in JCE licensed premises.

4 COMMUNICATION

- 4.1 The IDRC Chairman (Nick Patton) will inform the IDRC members and Newmarket trainers.
- 4.2 The IDRC will consist of the following:

- 4.4 However, there is always the risk of a highly infectious disease and we must be prepared for any eventuality, in which case IDRC will meet.
